All of the ICON team would like to thank you, our customers, for selecting us as your technology partner and we look forward to working with you in the coming year.

We welcome new customers Rockhampton Regional Council for DA Tracking and Eurobodalla Council who have selected FieldWorker for the Road Asset inspections and implementation was completed in December. Council is now up and running with the data capture software.

ICON is looking forward to a fantastic 2010. We have a strong and committed customer base, loyal staff and many great opportunities to keep us busy. Once again—THANK YOU!

Marie Eedy - CEO, ICON

Eurobodalla implements FieldWorker

After seeing how easy it was to create and maintain in-field applications with FieldWorker, Eurobodalla decided to automate their Road Inspections form which had previously been done with pen and paper.

Eurobodalla were pleased when the application was completed and installed within five days and are now piloting the application and will soon be producing reports from the information captured in the field using FieldWorker.

DA Tracking available on Local Government Procurement contract

Local Government Procurement (LGP) has appointed ICON to the panel of successful contractors for the provision of *IT&C Professional Services and Associated Products*. LGP represents the

needs of Councils with suppliers as well as providing extensive procurement, tendering and contract management support.

All six **ICON e-Planning** modules as well as **Trapeze Desktop**, **RapidRedact** and **Archive Manager** are covered by this provision.

The appointment means that Councils in NSW can purchase pre-approved Local Government solutions from the panel of contractors without the need to go to tender or seek supplier quotes for consideration.

Visit www.lgp.org.au for more information.

Warringah Exhibits Online

Warringah Council, NSW, received many online submissions during November 2009 as they exhibited their Local Environment Plan (LEP) and Development Control Plan (DCP) online using ICON's PlanningX-change module, **PLAN@**.

By converting Warringah's Planning Instruments into a database, Council can use their data in an innovative and user friendly way.

The community has certainly welcomed Council's forward thinking and the online comments demonstrate the appeal of this type of exhibition.

Once the plans have been gazetted, Warringah will make these documents available online via their website allowing the Community to interrogate the plans for property specific information.

In addition to this, Warringah has also selected **Trapeze Desktop** software allowing Planners to take exact measurements on maps or plans in real dimensions.

ICON User Forum dates announced—24th and 25th March—Agenda coming soon....

ICON Inaugural User Forum
"i-CONNECTIONS"

Wednesday 24th and Thursday 25th March, 2010

Hosted at Warringah Council, Dee Why, NSW
Agenda will be with you shortly
